### Breakdown of activity time.

We have been able to save our clients time and money by using the right motors, experienced personnel and utilizing the advanced Subsurface Geological Tracking Analysis software. When all services are performed, we can get the job done faster and more accurate than anybody in the business, while not exposing the clients to additional costs.

“When it takes Supreme Efforts to get to the Source of the Energy”

SPECIALISTS IN DIRECTIONAL, HORIZONTAL,  
AND MULTI LATERAL GEO STEERING

## SSES MWD and Directional Drilling Equipment

When using our SGTA Directional tracking software we were able to change the landing point, targets and projections automatically to stay in the better permeable zone throughout the lateral with little deviation in TVD.
